6% Available at launch 12 weeks lock Linear vesting at 2% per week thereafter	6% Available at launch or distribution (if after launch) 12 weeks lock Linear vesting at 2% per week thereafter	INITIAL LIQUIDITY <hr/> 1.5 TR	COMMUNITY WALLET <hr/> 419.622 TR

> TRANSPARENCY

To show our long term commitment to the project and the community, Fat Cat Killer Founders announce that they have locked the Liquidity Pool for 1 Year and they are now dedicating 99% of their currently available tokens at launch to the community wallet. It's part of their ongoing plan to turn the 99% into the 1%.

ALLOCATION AND DISTRIBUTION OF TOKENS

> FOUNDERS TEAM & ADVISORS 171.548 TR

> MARKETING 307.33 TR

> PLATFORM RESERVE 421.122 TR

- Initial LP reserve (no community vote needed) up to 1.5 TR
- Extended Liquidity Community Wallet (Subjected to Vote) 419.622 TR

> WHITELISTED WALLETS (Excluded from participating in tokenomics):

- **FCK Controller Wallet** - used for token management
- **Operational Wallet** - Operations commission fees safe
- **Marketing Wallet** - Marketing commission fees safe
- **Charity Wallet** - commission fees safe, sent once a month to a charity of our choice.
- **Lottery contract** - Lottery rewarding holders with prizes
- **Merchant Wallet** - In the future, It will allow us to exclude merchant payments from tokenomics thus making merchant processing much cheaper.
- **Multiple Lockup contracts** - Team and advisors receive their locked \$KILLER in this wallet/contract
- **Community Vote Contract** - Community decision driven platform expansion wallet

Softcap: N/A no ICO, project is internally funded

Hardcap: 900,000,000,000,000 coins (900 TR)

Fat Cat Killer will launch with 900,000,000,000,000 coins (900 TR) and through burn will gradually reduce total supply to 9,000,000,000,000 coins (9 TR) or less.

VOTING MECHANISM

- Community is responsible for the platform expansion decision.
- 1 coin = 1 vote | majority vote rules.
- 1 week notice is given prior to each vote.
- Duration of the voting process is 24 hrs.
- When participating in the voting process, voting coins cannot be sold or transferred during a set time voting window.
- When the voting period is closed, all voting coins will be unlocked.

As founders, we treat ourselves no different than our advisors, influencers, or developers. This means we have the same lockup provisions that apply to us all. In our commitment to transparency, we have locked this into our smart contracts.

- Founders lock-up date begins at the launch of \$KILLER.
- Advisors, Influencers and Developers: lock up date will begin at launch or at the date of receipt of coins given for contracted services.
- Each contract for services, payable in \$KILLER, is treated as its own project. Therefore each project has its own LOCK period, which is defined by the specific date of the coins received.

LOTTERY

Fat Cat Killer is going to have regular prizes given away at various intervals. \$Killer holders will be able to choose to lock tokens for a period of time to receive a predefined prize (or a token equivalent if legal and geographical difficulties will arise)

For example:

Locking up 10,000,000,000 tokens for a period of 1 month gives you a chance to win a Rolex

Locking up 1,000,000,000,000 tokens for a period of 1 year gives you a chance to win a Lambo

The duration of each round, the required entry and the prize will be defined by the foundation marketing team.

All tokens locked up for the duration of this give away will be available for withdrawal after the time is over.

Network fees to stake/participate in giveaways will be paid by participants themselves.

As well as the network fees to claim the tokens at the end of giveaway.

Multiple entries by the same user are allowed in the increments on single entry

THE LOCK

- On the day we launch, 6% is immediately available for withdrawal / sale. Twelve (12) week lockup period remains in force for 94% of locked coins. On 13th week, and every week thereafter, 2% of remaining coins are unlocked for immediate and unfettered use.
- After the 59th week, all coins are unlocked.
- All Coins, whether locked or unlocked, are visible via portal login on our website - as well as associated withdrawal status.
- When withdrawing coins, the total amount of unlocked coins must be withdrawn together in a single transaction.

** For influencers getting coins after launch - the start date is the date of coin distribution and the further lockup is the same as above*

TRANSACTION FEES

Transaction fees are locked within ranges for example we can adjust BUY and SELL tax between 0% and 9% , but we CAN NOT make it more than 9% total on each side.

\$KILLER transaction fees

> **BUY or SELL (9%)**

- **3.5%** of each buy/sell will be burned. This process initially manual will be fully automated and stops when total supply is at 9 Trillion or "less"
- **5.5% will be collected from each buy/sell and placed into a company multisig wallet to be exchanged for BNB and split into 3 parts (Charity, Operation Expenses, Marketing Expenses):**

0.5% of each buy/sell will be sent to a F.C.K Charity Wallet (multi signature) and then distributed to a selected charity (the selected charity will change based on world events at the time).

3% of each buy/sell will be moved to the company Operations Wallet (multi signature). These funds will be used for operating expenses.

2% of each buy/sell will be moved to the company Marketing Wallet (multi signature). These funds will be used for marketing expenses.

> **TRANSFER FEE (18%)**

- **7%** of each transfer will be burned. This process fully automated and stops when total supply is at 9 Trillion or "less"
- **11%** will be collected from each transfer and placed into a company multisig wallet to be exchanged for BNB and split into 3 parts (Charity, Operation Expenses, Marketing Expenses). Process of conversion initially manual will be replaced with automated process at a later date:

1% of each transfer will be sent to a F.C.K Charity Wallet (multi signature) and then distributed to a selected charity (the selected charity will change based on world events at the time).

6% of each transfer will be moved to the company Operations Wallet (multi signature). These funds will be used for operating expenses.

4% of each transfer will be moved to the company Marketing Wallet (multi signature). These funds will be used for marketing expenses.
